Partner Program

Tsarona
Business Center

What we offer?

We are mainly focussed in the Technology space, hence our offering

- Website design and Hosting
- Apps development for Windows, Android and IOS
- Computers/Laptops/Tablets/User Phones
- Printers/Scanners

What is a partner program?

Our partner program is a vehicle that we have developed to allow a business to quickly implements a solution even before they are financially capable of covering development costs. As a company grows, it has multiple departments that work to get to bring the desired results of the company, we are your IT department. We are completely involved in the project to see where we can give you an advantage from an IT perspective

Cost of Program

A commitment fee will be required irrespective of the below choices, such as a deposit to cover the basic costs such as domain registration and obtaining a server

Cash cost

- This is a comprehensive plan that significantly breaks down the cost of getting your project of the ground without loosing a piece of your company.
- This means that your obligation to Tsarona is purely financial for the life cycle of the project
- The cost is paid monthly, it will be around 10 percent of the quoted amount

Equity Shareholding

- This is for a company that is looking to hand off and delegate the specific work. We focus on where we are capable and join forces with the requesting company.
- This will mean that Tsarona will become a share holder in the project and play its part to ensure the company stay afloat

Process

- Minimum cost will have to be paid to ensure the commitment and commencement of the project, this will be quoted separately stating that it will be under the partner program. The work load will be managed and projects will be prioritize based on availability of contributors to the project
